

Condor 250 Wi ^e

PORTABLE

260 Bait

PORTABLE

Wireless Fishfinder

► 250 Wi FEATURES

- Special "Freecast" sealed, battery-operated, wireless 115 kHz transducer
- Wireless operating range: max 130 ft (40m)

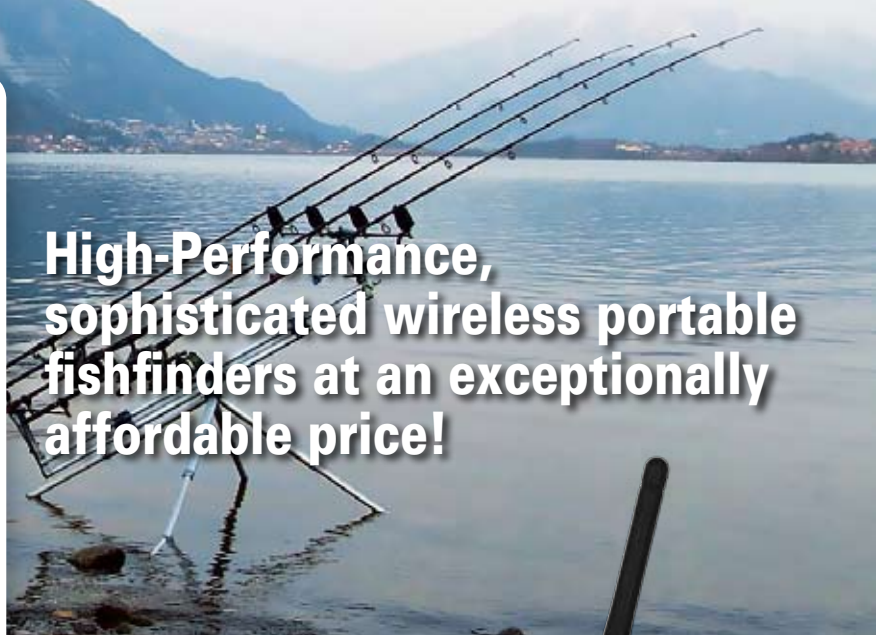

► 260 Bait FEATURES

- Wireless module with wide beam 115 kHz transducer
- Wireless operating range: max 1000 ft (300m)
- Monitoring and real-time display of the bait boat battery voltage

► COMMON FEATURES

- Depth capability: 2 ~ 100 ft (0.6 ~ 30m)
- Sonar beam angle: 80deg @-10db
- Automatic transducer power-on, by simply dipping it in water
- Water temperature sensor included in the transducer
- Radio frequency: 433.9 MHz
- Alarms: shallow water, fish, low battery
- Controls: Sensitivity, Depth Range, Noise Filter, Zoom
- Large, high contrast, 4.3" triple supertwist LCD screen, provides perfect visibility even with polarized sunglasses
- High resolution 240 x 128 pixel with 4 levels of gray
- Digital depth reading above each fish symbol
- High intensity, fully dimmable LED backlighting for night use
- Rugged portable case for a full protection of the fishfinder during storage or transport
- Zoom function to magnify the sonar image
- Multilingual menu system, with 21 memorized languages
- Operational Temperature: 14°F ~ 122°F (-10°C ~ 50°C)
- IPX7 level waterproof case design
- Control box Power Supply: 6~12V
- Perfectly sealed waterproof battery pack (uses 8 AA alkaline batteries not included)
- Sonar unit size: 6" x 4.3" x 1.73" (153 x 110 x 44 mm)
- Portable case size: 10.3" x 5.9" x 3.85" (262 x 150 x 98 mm)

High-Performance, sophisticated wireless portable fishfinders at an exceptionally affordable price!

- ▶ The new **Condor 250 Wi** represents the pinnacle in wireless fishfinding technology. Thanks to its unique wireless transducer, you can scan the surrounding area to a radius of up to 40 meters. The transducer is housed in a compact, sealed waterproof float with an inbuilt antenna which can be cast out like a lure with rod and reel.
- ▶ The new **Condor 260 Bait** boat fishfinder satisfies the needs of the most sophisticated and demanding carp fisherman. Specifically designed for use with bait boats, the **Condor 260 Bait** now enables the carp angler to use his bait boat to map out the lakes in which they are fishing and to find all the hot spots. The radio unit contained within the unit is very powerful giving a radio range of up to 300 meters radius.
- ▶ The waterproof base unit houses 8 AA size batteries which give many hours of operation. After use the display folds down into the base for protection and space saving and the whole unit can be carried by the integral carry handle.
- ▶ The intuitive menu system can be set in any one of the 21 languages programmed into the memory of the unit and makes both **Condor 250 Wi** and **Condor 260 Bait** very simple to use. Pressing the menu button reveals four windows giving access to the many different functions incorporated in this unit which can be easily selected by means of the “up” and “down” arrow keys. The settings remain stored in the internal memory of the unit once the power is switched off reducing the need to set it up again on the next outing.
- ▶ **Condor 250 Wi** and **Condor 260 Bait** sophisticated identification software detects any suspended target and shows them on the screen in the form of fish symbols, with the digital readout of the depth above them.
- ▶ The high resolution LCD screen with 240 vertical pixels, provides very crisp images from any angle, and can be easily read in all light conditions, even in sunlight or when wearing polarized sunglasses. The white LED backlighting is dimmable and allows the unit to be used in low light conditions or during night use.
