B-45 thru-hull bronze transducer

The best dual frequency bronze transducer!

- Actual power of 600 watt
- Dual frequency df 50/200 kHz
- Through hull mount, no fairing block
- Connector suitable on Condor units with adapter cable

Adapter cable for thru-hull Condor transducers

- Power cable and transducer cable together
- Plug connector suitable on any Condor unit
- Shielded cable for noise reduction

Suction Cup Kit for Condor transducers

- Transducer mounting without holes or screws
- Suitable for any of the Condor range transducers
- Perfect in combination with the portable kit bag

PW-92 - Surge Protection Filter

Very effective extra voltage protection filter.

It allows to stop the extra voltages that come from the alternator, and that can reach even 180 Volts.

If used in combination with a lead acid battery (anti theft type) it sets up a true "life insurance" for your instrument.

Maximum current: 1 Ampere

Portable Bag Kit for fishfinders

Fits all Condor fishfinders, making them portable!

- Housing for a lead-acid battery 12V 7Ah (mm 151x94x65)
- Front door, that also acts as sun shield
- Anti-reflex black side shields
- Transparent front shield protects from the rain and splashes
- Rear door, for a quick access to the battery
- Two fishnet side pockets for accessories stowing
- Convenient back pocket (for manual, wallet, keys holders, etc.)
- Side adjustable rubber grip handle
- High quality materials finishing
